

HALLOWEEN FRIGHT NIGHT

Entrants must be prepared that this event is designed to give you goose-bumps. Ensure all entrants no matter the age, are able to cope with the odd snap and crackle in the dark. General 'screams' of delight will be disregarded and be taken as being part of the fun of the Halloween themed event.

All the fun and action is going to be at Centennial Drive camp ground just off Mount Road in the delightfully dark and spooky Mt Crawford forest. The hash house [aka the Black Hat Tavern] is nestled between Mt Crawford and little Mt Crawford and the media is promoting that there could be an outbreak of the treacherous 'Solanum' virus.

HOW TO GET HERE

Suggested route from the city:

BY BUS: good luck with this option, it would be easier to hitch a ride with a headless horseman.

BY CAR: FROM THE CITY take North East Road via Inglewood towards Gumeracha travelling past ghostly Millbrook Reservoir.

Turn LEFT just after the Chain of Ponds cemetery, continue to travel for 3km onto B31 towards Williamstown and Lyndoch.

Turn RIGHT and enjoy the views on Checkers Hill Road, watch for any stray and roaming cyclists.

At the end of Checkers Hill Road, turn LEFT and travel 5km along the Forreston Road until reaching a T-Junction.

Turn LEFT onto Warren Road then next RIGHT into Cricks Mill Road.

IMMEDIATELY turn LEFT onto the unsealed Mount Road. Follow this until you go around a 90 degree bend. Just after crossing a small troll bridge turn RIGHT into the zombie infested camp ground nestled between Mt Crawford and little Mt Crawford.

IN THE EVENT OF ZOMBIE ATTACK

3 STEPS TO SURVIVING INFESTATION

1. Avoidance 2. Termination 3. Disposal

1. AVOIDANCE

All zombie infestations render the location uninhabitable. The citizen's first duty is to vacate the area and proceed immediately to an authorized Rescue Station. Only authorized Z.E.R.O. personnel will manage relocation – but, the key to an effective evacuation is COMPLETE AVOIDANCE OF HAZARDOUS CONDITIONS while en route.

EVACUATE

RELOCATE

Gather family and essential small valuables only. DO NOT attempt to secure or defend property or possessions.

Proceed immediately to the Rescue Station assigned to your area. In the absence of Z.E.R.O. Relocation Management personnel, monitor local radio broadcasts for directions.

DO NOT ENGAGE!

Is is critical to remember that any zombies encountered during relocation are NOT family or friends but REANIMATED CORPSES INFECTED WITH A DEADLY CONTAGION. Under NO circumstances should you engage one in any kind of interaction. Contagion is transmitted via a bite, and ANY interaction with a zombie results in repeated attempts to bite.

IN THE EVENT OF A BITE...

Apply pressure to the wound with padding found in the supplied BITE KIT until proper medical supervision can be accessed.

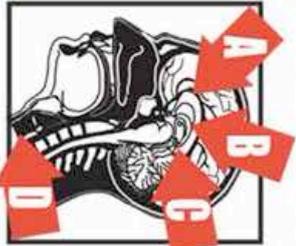

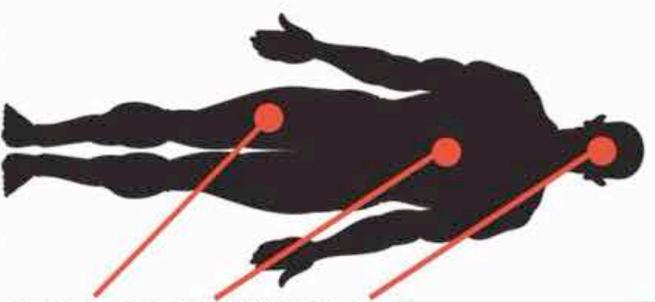

IF THE WOUNDED INDIVIDUAL EXPIRES after being bitten, VACATE THE PREMISES IMMEDIATELY or execute guidelines found in next section.

2. TERMINATION

Engage this step only if in an unsecured location, and ONLY if you have positively identified a zombie by using the Zombie Classification Cards (supplied). Otherwise, any terminations should be referred to and executed by a duly authorized member of Z.E.R.O. or your local licensed Zombie Exterminator.

CEREBRAL NEUTRALIZATION

The ONLY known method for effectively terminating a zombie, either by cranial penetration or blunt force trauma (A, B, C) or decapitation (D).

CENTER MASS

For stopping or slowing down target ONLY when distance does not permit a head shot. NOT an effective termination method.

LOWER EXTREMITIES

For stopping or slowing down target ONLY when distance does not permit a head shot. NOT an effective termination method.

3. DISPOSAL

"TAPE & TAG"

After terminating the zombie(s), mark the perimeter to enable Z.E.R.O. Disposal Unit personnel to locate the remains and ship to a Mobile Acid Disintegration (M.A.D.) unit for disintegration. This can be completed in two simple "Tape & Tag" steps:

1. Mark area surrounding the remains with an appropriate length of CAUTION, ZOMBIE OUTBREAK ZONE tape (supplied).
2. Attach a FORM 28D tag (supplied) to the toe of the corpse.

DO NOT INCINERATE!

Incineration releases airborne toxins which spread infection to the uninfected deceased or, in areas of heavy humidity or precipitation, the recently interred deceased. This exponentially increases infestation levels.
